

Compnet Cloud Managed Solutions

Cisco webex Solution

The global perspective requires new ways of doing business. It simply is not feasible to travel to all locations to meet prospects, customers, fellow executives, and colleagues. It's inefficient, too expensive, and hampers productivity. Today's companies are national or global operations, with distributed workforces, nationwide/worldwide clients, and round-the-clock customer support. When the workday ends in one part of the world, it's just beginning on another continent.

Increasingly, knowledge workers are trading cubicles at corporate headquarters for remote offices, mobile workplaces, and virtual rooms. Travel budgets continue to shrink, while the need to work collaboratively with global teams continues to amplify.

One such technology solutions provided by Compnet is web conferencing, which offers organizations the power to reach people, share information, collaborate and stay connected with global, virtual teams—any time, anywhere. The introduction of web conferencing has forever transformed the way organizations do business.

Benefit :

- **Use People-Centric Web Conferencing Collaboration**

Take advantage of industry-leading web conferencing capabilities to facilitate compelling, productive team meetings. With Cisco WebEx online collaboration solutions, organizations of any size can:

- Promote collaboration with anyone globally, anywhere, anytime, on any device
- Increase productivity with an engaging, interactive web conferencing meeting experience
- Improve day-to-day efficiency and streamline meeting activities
- Save time and money by reducing the need to travel

- **Reduce Costs, Optimize Investments**

Cisco WebEx web conferencing solutions help reduce costs and optimize IT resources. Delivered through the Cisco WebEx Cloud, these solutions are easy to implement and scale throughout your organization. Cisco WebEx solutions:

- Require no large, up-front investment, and offer a predictable cost and licensing model
- Offer quick global deployment and easy adoption for users inside or outside firewalls
- Help you cut costs on hardware, software, and maintenance
- Give you the time to focus on strategic business projects instead of conferencing operations
- Integrate web conferencing with existing Cisco investments such as Cisco Jabber and Cisco TelePresence solutions

Features :

Web Conferencing Meetings with Anyone, Anywhere, on Any Device. Conduct web conferencing-meetings in real time with Cisco video and web conferencing products.

- **Cisco WebEx Meeting Center**
 - Meet with anyone online to present, share, and collaborate
 - Accelerate decisions, keep projects on track and exchange ideas
 - Keep connected on the go from any device or location
 - Use any standards based video device, with personal, always available web conferencing meeting rooms
- **Cisco Collaboration Meeting Rooms (CMR) Cloud**
 - A cloud-based video collaboration service
 - Provides seamless video bridging for all standards-based video devices
 - Host web conferencing meetings in your always available WebEx Personal Room
 - Share your unique personal meeting ID that never changes
- **Cisco WebEx Meetings Server**
 - Get a highly secure, private cloud (on-premises) deployment of Cisco WebEx technology
 - Use an all-in-one web conferencing solution that incorporates audio, video, and web conferencing
 - Get the same superior WebEx user experience and features, including iPad and iPhone client support
 - Extend IP telephony to conferencing
